SPECIALTY FASTENERS

Fasten, Strengthen and Secure:

From threaded inserts and Spinner-Grip™ Flange Nuts & Bolts to Kwik-Lok® Pins.

Jergens is a world leader in innovative fastening technology for a wide range of applications. Our user-friendly products are designed with unique, problem-solving features that increase efficiency and effectiveness. With thousands of standard products available, and the ability to modify standards and manufacture custom specials, Jergens can meet your requirements while bringing simple solutions to complex applications.

KWIK-LOK® PINS.....5-34

Kwik-Lok® Pins provide quick, easy positive engagement and high holding strength for applications requiring frequent, repetitive use. Available in a variety of diameters and lengths, their simple, smooth operation makes Kwik-Lok® Pins an ideal replacement for detent pins, clevis pins and cotter pins.

SPRING LOADED DEVICES..... 35-52

Our unique Solid Drive Design allows the entire plunger to move, eliminating the need for set screws that often result in hard-to-remove plunger bodies and lost springs.

THREADED INSERTS..... 53-68

Rated among the highest in pullout strength, Jergens' keylocking inserts can easily be installed with standard drills and taps. Competitive products require special drills, taps and installation tools. MS/NAS products available.

MISCELLANEOUS FASTENERS.....69-80

From pull dowels, clevis pins, and leveling mounts to rod ends, washers, and yokes, Jergens has the fasteners you need. Exclusive to Jergens, our Spinner-Grip™ Self-Locking Fastener System has an all-metal construction that is easily installed and completely re-usable.

HANDWHEELS, KNOBS & HANDLES81-142

Jergens Specialty Fasteners maintains a large inventory of several varieties of knobs, handles, hand wheels, and cranks. Whether you're looking for prototype or production quantities, we can help!

TOGGLE CLAMPS 143-186

Jergens' toggle clamps are a top quality alternative to more expensive brands. We maintain a large inventory and are happy to help identify the right product for your application.

Jergens Company Profile

Jergens Inc. was founded in 1942 by Jack Schron, Sr. and his father Christy, to provide standard components for building jigs and fixtures. Today the fourth generation of family involvement continues stronger than ever. Throughout its sixty-year history the company has grown into four separate operating divisions: Tooling Component Division (TCD), Jergens Industrial Supply (JIS), Acme Industrial Company (AIC), and Advanced Systems Group (ASG) Division of Jergens. While all divisions are vital to the Jergens family, the TCD Division is the centerpiece of our manufacturing capabilities. In June 1999, Jergens moved into a new 110,000 square foot facility and prides itself by manufacturing over 80% of its product offering, as well as setting the standard for producing the highest quality components in our industry.

Jergens Tooling Component Division now comprises 3 distinct business units: Workholding Solutions, Lifting Solutions and Specialty Fasteners. Building on its reputation of uncompromising quality standards, Jergens is committed to helping its customers achieve leaner, more profitable manufacturing, and continues to add products and engineered solutions for an integrated approach to “Manufacturing Efficiency.”

Today, you’ll find our tooling components, fasteners and hoist rings at work in just about every industry on every continent. And our innovative Quick Change Workholding Solutions like Ball Lock[®] Mounting System have changed the way manufacturers worldwide think about productivity.

Jergens actively supports global, multinational and internationally based customers with metric dimensioned product offerings as well as many inch threaded products that are common in aerospace and industrial applications around the world. In important manufacturing markets in Canada, Europe, Asia and Latin America, Jergens representatives and stocking distributors have represented Jergens for more than 30 years. Our international representatives are trained technically on our products and provide expertise to customers and sub dealers in applying Jergens technologies to local industries. In recent years, two wholly owned affiliates were formed to serve the Chinese and Indian markets. Jergens (Shanghai) Commercial Co., Ltd. opened in 2006 and Jergens India Private Ltd., Navi Mumbai India opened in 2009. These fully registered trading subsidiaries employ trained multi-lingual engineers and commercial managers who provide marketing and importing, warehousing, distribution and technical support to our customers, distributors and local representatives.

Additionally, we offer a wide range of metalworking tools, clamps, and supplies to manufacturers in Northeastern Ohio, through our JIS Division. Acme Industrial, located in Carpentersville, Illinois, is a premium manufacturer of precision drill bushings and keylocking thread inserts. Our ASG Division specializes in products for light assembly ranging from torque-controlled electric screwdrivers to automation systems.

In addition to our unique product designs, we lead the industry with unparalleled customer service and delivery. Our website is a good example of our commitment to be the most innovative company in our industry. Customers and distributors can check stock and order on-line, view the Jergens catalog, and even download 2D, 3D and solid model CAD drawings in a variety of formats. Visit our website at www.jergensinc.com for the latest news and product information, as well as links to our other divisions. The Jergens family thanks you for your business.

Distribution of Jergens Products

Jergens is proud to be represented by a network of qualified distributors throughout the world. If you do not know the name of the distributor nearest you, please call Jergens Customer Service at 1-866-KWIK-LOK or visit www.jergensinc.com.

Quality Policy

Jergens, Inc. manufactures and supplies only *quality* products. Our quality system is ISO 9001: 2008 Certified. Center-Pull and Side-Pull Hoist Rings are CE Certified. If there is a problem with any of our products, please contact your local Jergens Distributor or contact our Customer Service Department.

Design Aids

Jergens, Inc. offers several CAD drawing formats for use in fixture design. Our Fixture Pro® software is available on CD. Our internet site (www.jergensinc.com) offers our complete catalog with hot links to CAD drawings on most of our products. We also offer 3D solid models of our products via the internet.

Application Assistance

Jergens Inc. maintains a complete Technical Sales Department to work with you. Please feel free to call upon their knowledge and experience. Application videos are available for the Ball Lock® Mounting System, 5-Axis Fixture Pro®, Spinner-Grip™ Flange Nuts, and Hydraulic Vise Column products at www.jergensinc.com or www.youtube.com/users/jergensinc.

Engineering Changes

Product improvement is a continuing process at Jergens, Inc. Specifications and engineering data are subject to change without notice. **If current information is critical to your design, it is suggested that you contact the Jergens Customer Service Department, or download the most current drawing from our website*, to verify any dimensions or specifications.**

* 3D Solid Models are available in multiple formats from www.jergensinc.com

Bar Coding

Jergens' boxed and bagged products are fully bar coded for automatic identification. The bar code labels contain the ASCII Code 39 format, which was chosen as being suitable for most bar code readers. Jergens' bar codes will identify part numbers and manufacturer's codes.

Specials

Jergens, Inc. will modify any item that is similar to our standard component parts. Please contact your Jergens Distributor with your request for a quote. Prints or sketches should be furnished if possible.

TCMA Standards

Products throughout this catalog meet the standards of the Tooling Component Manufacturers' Association. The items are asterisked and are interchangeable with other tooling component manufacturer's products.

Material and Finish Specifications

Stressproof®: A severely cold worked, furnace treated steel bar. Produced by LaSalle patented process to obtain high strength, free machinability, good wear, and minimum warpage in the bar.

Alloy Steel - 4140 or equivalent

Low Carbon Steel - Free Machining 1215, 1018, or equivalent

52100: QQS-624

Zinc Plate: ASTM B633, Type III, Class FE/ZN 5

Cadmium Plate: AMS-QQ-P-416, Class 3, Type 1

Black Oxide: MIL-DTL-13924 and AMS-2485

Black Anodize: per Mil. Spec. MIL-A-8625, Type II, Class 2 and AMS-2472

Passivate: AMS 2700

Alternate Finishes available upon request.

Specifications and Materials28-29

Kwik-Lok® Pins – Selection and Ordering

1. Choose Handle Shape and Style:

- T, L, or Button
- Heavy Duty T, L, or Button
- Ring Handle, Lifting Ring, or Recessed Button
- Double Acting (Push/Pull) T or L

Material

- Aluminum
- Stainless Steel
- Stainless Steel
- Stainless Steel

2. Select Pin Body Material

- 17-4-PH heat treated Stainless Steel for highest strength, corrosion and scratch resistance
- Alloy Steel heat treated and cadmium plating to military specifications

*Grip Length is measured to edge of locking ball
 Standard Grip Lengths: 1/2"–6", 10–100 mm
 Special Grip Lengths available on request

3. Specify Pin Diameter and Grip Length

Standard Kwik-Lok® Pin Diameters			Double Shear Resistance (Minimum)

KWIK-LOK® PINS

Heavy Duty T&L Handle Pins

17985, 17986, NAS1333-NAS1343

C2=Stainless T Handle
C5=Stainless L Handle

- Also known as Ground Handling Pins
- Heavy Duty welded handle provides additional impact resistance
- Includes split ring for easy attachment of optional lanyard.
- All stainless steel handle and button provide additional corrosion resistance

Heavy Duty Detent Pins MIL-P-45952/1

The Heavy Duty Detent Kwik-Lok® Pin is a high quality shoulder style alignment pin for applications that don't require the positive locking ball feature.

- Heavy duty spring and 2 spring loaded stainless steel locking balls provide high pull out force
- Available in 300 Series Stainless steel or heat treated alloy steel. Also in 17-4 PH heat treated stainless steel upon request
- Includes split ring for easy attachment of optional lanyard.

Part Numbering:

Lanyards with Tab, attached to Pins

To order Kwik-Lok® pins with attached lanyard and tab (fig. 1), photo on page 24. Specify the six digit pin number followed by two letters from the tables above to define the lanyard length, type of lanyard and tab mounting hole diameter. The first letter designates the length of the lanyard and the type of Tab. The second letter (from table 1) designates the size of the hole in the tab for the mounting screw.

Example A: For an Aluminum T-Handle with stainless steel pin body 1/2" x 1.0", with an attached 8" Lanyard and Round Stainless Steel Tab with a mounting hole diameter of 0.257" (6.5 mm), the part number is 801082CR.

Lanyards with 2 loops, 1 loop, or loop/eyelet

To order Kwik-Lok® pins with lanyard and 2 loops (fig. 2), 1 loop (fig. 3) or loop/eyelet (fig. 4), specify the six digit pin number followed by a two letter combination from above to define lanyard length, number of loops or loop/eyelet with mounting screw size.

Example B: For all Stainless Steel L Handle Pin, 1"x 6", with attached 24" (610 mm) lanyard and 2 Loops, the part number is 805775EH.

Example C: For all Stainless Steel Button Handle Pin, 6 x 40 mm, with attached 10" (254 mm) lanyard and Loop/Eyelet for M5 screws, the part number is 855417HD.

Note: Split rings are not included when attaching lanyards, unless customer specified. In that case add an R as a third letter to the extension.

Part Numbering: Lanyards to be Supplied Separately

For lanyards with tabs, ordered separately without pins (photo page 24), specify the six digit pin number followed by the hole size letter from Table 1.

Example D: For a 24" (610 mm) lanyard with stainless steel round tab with a mounting hole diameter of 0.406" (10.3 mm), the part number is 890074V.

NEW!

Standard Duty Detent Pins

Ideal for basic holding and removal applications that don't require a positive locking ball feature.

- Body (Shank) is CRES 303 Stainless with CRES 316 stainless spring & ball
- Pins are activated by push or pull motion
- Includes split ring for attachment of optional general purpose lanyard
- Optional materials, sizes, and styles available

PRECISION PARTS FOR MILITARY APPLICATIONS

Jergens is an ISO 9001:2008 certified, government-approved manufacturer. We are your complete source for mil-spec Kwik-Lok® pins, spring-loaded devices, threaded inserts, and threaded components and washers. We also offer workholding components, locating components, handles, knobs and handwheels, lifting products that include center-pull and side-pull styles of hoist rings, and toggle clamps.

Jergens can offer quick turnaround on special orders, low or no minimums, and engineering expertise that results in our ability to answer and help with technical questions. We offer the advantages of relationship and know-how.

- **MS, NAS, DFARS, and RoHS Compliant Parts Available**
- **Military Drawings Available in 3D Solid Models (Multiple Formats) from www.jergensinc.com**
- **Manufacturing #: 697830**
- **FSCMI Cage Code: 94882**

Jergens Spring & Ball Plungers Last Longer

...And Here's Why!

Spring Plungers

Spring Plunger tips are manufactured using case hardened steel. This means they have a protective shell, about .10" deep.

Jergens Spring and Ball Plungers have accurate end forces, are easy to install, and are competitively priced. They are manufactured in the U.S.A. in a ISO 9001:2008 certified quality system.

And if these aren't enough reasons to specify Jergens Spring and Ball Plungers, here are a few more:

Better Point of Contact

The Jergens plungers are turned and the tips generated in one smooth continuing process. This results in a constant radius tip, perfectly tangent to the point where the tip joins the shaft. Conventional two step, turn and grind operations, can leave ridges on the shaft at the tip junction and can also produce out-of-round tips. These, in turn, can gouge or score finely finished parts or can cause detent cams to hang up or stick.

Extra Length Springs for Longer Life

The longer the spring, the longer its life. Jergens goes to extra lengths to minimize the thickness of the base flanges on all of its plungers. That allows us to use longer springs with less chance for fatigue and breakage.

Improved Plunger to Body Alignment

The long base flange allows for a larger bearing surface. This means improved plunger-to-body alignment, truer travel, and much improved side load characteristics.

Tighter Fit Resists Contamination

Closer machining tolerances, minimum plunger-to-body clearance, and smoother plunger finish make Jergens plungers fit more snugly in the plunger bore. This improves plunger alignment and provides extra resistance to contaminant entry. The results: dirt and grit cannot get to the bearing surfaces to shorten the life of the plunger.

Better Plunger Adjustment

The Solid Drive Design assures that during removal or adjustment of the plunger, the whole plunger is moving, not just the set screw. This means no lost parts or springs falling out of the plunger.

Ball Plungers

Positive Control of Spring Pressure

Accurate spring alignment is maintained by using a stainless rivet with a long shank on larger sizes of Jergens Ball Plungers. This precisely positions the spring for more accurate ball travel and provides positive control of spring pressure. Conventional floating discs are easily misaligned, while the rotation of the inner ball on dual-ball plungers results in less wearability on both the spring and the ball.

Longer Spring Life

By minimizing the lining pin head thickness, Jergens is able to use the longest possible springs. This, of course, means less fatigue and longer spring life.

Uniform Ball Projection

The distance by which the ball projects from the body of the plunger must be uniform from plunger to plunger. This uniformity is maintained by precisely controlling the crimping pressure applied to the neck of the plunger. Accurate machine controls plus rigid inspection procedures keep variances in ball projection to within $\pm .005$ ".

Spring Stops52

Spring Plungers Inch

- Single unit construction
- No set screw to separate from plunger body
- Better reliability
- Steel tips are case hardened steel
- Close tolerance between tip and body

- Material: Body – Low Carbon Steel, Black Oxide or 303-Stainless Steel
Tip – Steel or Stainless Steel
- Thread: 2A-UNC
- 3D Solid Models are available in multiple formats from www.jergensinc.com
- Conforms to TCMA dimensional standards

Plunger tips are color coded to indicate light or heavy force:
 Silver = Steel Tip, Light Force
 Black = Steel Tip, Heavy Force

Hex drive in rear for spring plunger insertion.

Unlike conventional spring plungers, the body of a Jergens Solid Drive Plunger is machined in one piece. The spring is assembled from the top so that there is no need for a set screw. Solid Drive Plungers do not have a set screw which can loosen or separate from the plunger body. The advantage is no lost springs, no need for “easy-out” tools. When adjusting Solid Drive, you can be sure the plunger body is turning and not a set screw.

Specials available, see page 46 for Plunger Quote Request worksheet.

* Not available in DRIVE construction.

NOTE: For easy insertion of Spring Plungers with locking elements, the tapped hole should be countersunk at least .030-.045" (0.76-1.14mm) larger than the major diameter of the plunger.

SPRING LOADED DEVICES

Spring Plungers Inch

- Single unit construction
- No set screw to separate from plunger body
- No need for "easy-out" tools
- Better reliability
- Steel tips are case hardened steel
- Close tolerance between tip and body

- Material: Body – Low Carbon Steel, Black Oxide or 303-Stainless Steel
Tip – Delrin
- Thread: 2A-UNC
- 3D Solid Models are available in multiple formats from www.jergensinc.com
- Conforms to TCMA dimensional standards

Plunger tips are color coded to indicate light or heavy force:

- White = Delrin Tip, Light Force
- Blue = Delrin Tip, Heavy Force

Hex drive in rear for spring plunger insertion.

Unlike conventional spring plungers, the body of a Jergens Solid Drive Plunger is machined in one piece. The spring is assembled from the top so that there is no need for a set screw. Solid Drive Plungers do not have a set screw which can loosen or separate from the plunger body. The advantage is no lost springs, no need for "easy-out" tools. When adjusting Solid Drive, you can be sure the plunger body is turning and not a set screw.

Specials available, see page 46 for Plunger Quote Request worksheet.

Plunger Wrenches

IMPORTANT: It is not recommended that a screwdriver be used to insert ball or spring plungers from the ball or plunger end. The tip of the screwdriver will force the ball or tip of the plunger below the surface of the end of the plunger. This may compress the spring to a solid, causing possible damage to the spring plunger. It is recommended that a Jergens Plunger Wrench be used or that a slot be ground in the end of a screwdriver to clear the height of the ball or tip for each size ball or plunger used.

Part Number	Thread Size of Plungers	
	Inch	Metric

Ball Plungers Inch

- Body Material: Low Carbon Steel, or 303 Stainless Steel
- Ball Material: Stainless, 440
- Spring Material: Stainless, 17-7 PH
- Finish: Black Oxide on Body
- Thread: 2A
- Dimensionally conforms to TCMA standards
- 3D Solid Models are available in multiple formats from www.jergensinc.com

SPRING LOADED DEVICES

Retractable Plungers Hand Retractable Locking Style

- Improved design allows plunger pin to be locked in fully retracted position
- Used in machining applications as positioners, loading pins or indexing devices
- Plunger pin has slight taper on end to assure easy alignment
- Zinc Plated Carbon Steel, 303 Stainless Steel
- Phenolic Nose Prevents Marring of Soft Material
- Supplied with locking element

Spring Locating Pins

The Jergens Spring Locating Pins are designed for fixturing small parts in tight or compact space. Ideal for positioning and chucking flat parts and round parts and for profile clamping.

- Material: Body, aluminum
Pin, steel, plastic, or stainless steel
- Finish: Steel Pin, case hardened, zinc coated
Plastic Pin, delrin
Spring, steel
- Economical
- Easy to handle and mount
- Ideal for positioning flat or round pieces
- Maintains constant pressure on parts
- Minimizes fixturing space

*Uses elastomer plastic spring

SPRING LOADED DEVICES

Spring Locating Pins Installation Data

To determine mounting hole locations, use the following formula:

$$L = \frac{S}{2} + W + X$$

- L = Location
- S = Diameter of Locating Pin
- W = Width of Workpiece
- X = See Chart

Application Ideas

Position and hold flat parts.

Position and hold round parts.

Position and hold from the inside to the outside.

Position and hold various profiles of parts.

Eccentric Liners

Part Number	A	B	C	D
36291	.250	.500	.390	.079
36292	.438	.687	.469	.079
36293	.500	.750	.547	.079
36294	.625	1.000	.705	.118

Eccentric Liners allow for adjustment of spring pin tension due to part material variations, different tolerance requirements, or force adjustment.

Installation Tools

Locating Spring Pin Installation Tools are designed to make installation easier.

Refer to the charts on page 50 to determine which tool to use.

Spring Stops Button Type

- Material: Body, Zinc Aluminum Alloy ZA-12
Plunger, Low Carbon Steel
- Heat Treat: Plunger Case Hardened
74-77 R30N

Jergens Features:

Set screw allows for adjustable plunger travel.

Angled mounting slot provides a more secure hold.

End Force (Half-Depressed)

36101, 36104, 36107 – 10 lbs./6.8 kg

36102, 36105, 36111 – 14 lbs./13.6 kg

36103, 36106, 36109 – 32 lbs./18.14 kg

Installation Information

1. Drill to allow full tap depth shown in chart. Note: Tap drill is oversized; see chart below. Countersink as shown in chart.

2. Tap to depth shown in chart.

3. Install insert .010" to .030" below surface.

4. Drive keys down with proper installation tool.

Removal Information

Jergens Keylocking Inserts can be removed without damage to the parent material.

1. Drill the insert to the size and depth shown under removal data in the chart below.
2. Bend the keys down and break them off.
3. Remove the insert using an E-Z out or similar tool.

NOTE: Install insert .25mm to .76mm below surface and drive locking keys down. See C'sink Diameter column above.

Keylocking Inserts Metric/Inch Inserts

Create Metric Holes... With Inch Taps!

This unique product allows you to create a metric thread utilizing inch drills and taps. The insert O.D. is inch sized, the I.D. is metric.

Metric Internal/Inch External - Heavy Duty Industrial Style

Part Number Carbon Steel	Insert			Installation					Removal

All dimensions are in inches except for internal thread, which is metric.

Bolster Plate Bushings

- Material: Stressproof
- Finish: Black Oxide
- Internal Thread: 2B-UNC
- External Thread: 2A-UNF

Repairs are made quickly, easily, and right on the machine. Re-tap bolster plate hole, insert the threaded bushing to match, use a locking type sealant to lock the bushing in place. The Bolster Plate Bushings can also be used as threaded bushings in cast iron machine bases where greater thread strength is necessary. Eliminates the problems of "pulled-out" cast iron threads, reduces the need for bulky threaded cast iron sections.

THREADED INSERTS

Keylocking Inserts Extra Heavy Duty Industrial Style

The increased wall thickness and greater external thread area of these extra heavy duty threaded inserts offer greater pull-out strength, stability, and longer life. These inserts should be used in materials with lower ultimate shear strength to obtain maximum pull-out strength and holding power.

- Greater Thread Area
- Increased Shear Engagement
- Offers Holding Power Comparable to Standard Heavy Duty Inserts in High Shear Strength Material
- Material: Carbon Steel Inserts - C1215 or equivalent
Stainless Steel Insert - 303
Keys - 302
- Finish: Carbon Steel Inserts - Parkerized
Stainless Steel Inserts - Passivated
- Tolerances: ±.010
- Keys: Inserts with internal thread size of 5/16-18 or larger are furnished with four locking keys.
- RoHS compliant

See chart on page 54 for installation information.

Keylocking Inserts Solid Industrial Style

- Material: Carbon Steel Inserts - C1215 or equivalent
Stainless Steel Insert - 303
Keys - 302
- Finish: Carbon Steel Inserts - Parkerized
Stainless Steel Inserts - Passivated
- Tolerances: Inch \pm .010
Metric \pm .25mm
- Keys: Inserts with internal thread size of M7 or larger are furnished with four locking keys.
- RoHS compliant

- Salvage expensive castings
- Relocate holes that have been drilled or tapped in the wrong location
- Fill holes that are too large
- No need to alter original bolt size

Miniature - Metric 303 CRES Keylocking Threaded Inserts

Material: Inserts - 303 CRES

Keys - 302 CRES

Finish: Passivated

Tolerances: ±.25 mm unless specified otherwise

Internal Threads: Per Fed Std H28/21, MJ Form

Dimensions: All dimensions below are in millimeters

Keys: Miniature Inserts are furnished with 2 locking keys

Material Identification Mark: None

Lubrication: Dry Film Lube on Self-Locking Inserts only

RoHS compliant

Non-Locking

THREADED INSERTS

Inch Thread Repair Insert Kits

The Jergens Keylocking Inserts provide strong and durable threads in most types of material. They are easily installed using standard drills and taps.

The Jergens Thread Repair Insert Kits include inserts, an installation tool, and installation and removal instructions.

The Kits are available with either inch, metric, or metric internal/inch external carbon steel inserts.

Each Kit is comprised of one size of insert in various quantities. For Thread Repair Kits that include several different sizes, see pages 64 – 65.

THE **Jergens**® DIFFERENCE

Keylocking Inserts

OURS

Jergens keylocking inserts are easy to install with standard drills and taps.

THEIRS

Competitive thread repair devices require special drills, taps, and installation tools.

JERGENS KEYLOCKING INSERTS

VS. THREAD REPAIR FROM OTHER MANUFACTURERS

Easy installation requires no special tools: uses standard drills and standard taps.

Installation requires special drills, taps, and installation tools.

“Keys” mechanically lock the insert into the base material.

Springs or locking patches do not mechanically lock the insert.

Rated among the highest in pullout strength of any thread repair device on the market.

Less pullout strength versus Jergens inserts.

Wide variety of styles, including thinwall, heavy duty, extra heavy duty, and solid inserts in both stainless steel and carbon steel materials.

Limited offerings may force you to settle on a device that doesn't meet all of your needs.

MISCELLANEOUS FASTENERS

Miscellaneous Fasteners

Alloy Steel Pull Dowel Pins	71-73

Pull Dowel Pins, Stainless Steel	73
Pull Dowels	74
Rod Ends	75
Washers, Heavy Duty Flat	79
Yokes	76-77

Spinner-Grip™ Flange Lock Nuts

- Free spinning installation eliminates the need to wrench the nut down the fastener.
- Locks to the part, not to the threads.
- Grade 8 strength and quality, and will work with any grade fastener.
- Hardness of 28 - 38 HRC: more effective at maintaining clamp load under vibration.
- Greater temperature range than nylon insert locknuts, and will not be effected by humidity.
- Flat washers are not needed, unless in a slotted application.
- Spinner grips are not limited to 5 reuses, unlike most prevailing torque lock nuts.
- Jergens maintains inventory of Zinc plated product, as well as plain finished (un-plated) product so you can specify your plating of choice.
(Please allow 2 – 3 weeks lead time for plating.)

Note: Additional charges apply to plated product. Charges vary by plating type.

Spinner-Grip™ Flange Locking Bolts

- Save time and money by eliminating the need for other locking hardware.
- Conical flange locks the bolt to the part for better holding power.
- Easily uninstalled and reused.
- Can be used in tapped holes, or through holes with the mating Spinner-Grip Nut.
- Spinner-Grip™ Bolts do not have serrations that mar the plating or surface finish of your parts or cause rusting under the bolt head.

Note: Product available made-to-order only. Minimum product quantity applies. Contact Specialty Fasteners 866-KWIK-LOK (594-5565) for details.

Why a conical flange?

Conical design locks the bolt to the part without the need for lock washers, flat washers, locking elements, etc.

Alloy Steel Pull Dowel Pins

Jergens Offers 3 Styles of Precision Ground Pull Dowels

**Spiral Groove
(Grooves Help to Relieve Trapped Air)**

Features, Applications & Benefits

- Internally threaded hole allows removal of pull dowels with a standard screw.
- Standard Round Pull Dowels are typically used in applications featuring a through hole.
- Spiral Groove Pull Dowels feature a groove cut to allow trapped air to be released.
- Flat Vent Pull Dowels feature a ground flat on one side to release trapped air.
- Spiral Groove and Flat Vent Pull Dowels are typically used in blind hole applications.
- All of Jergens Precision Ground Pull Dowels are constructed of heat treated alloy steel.

**Flat Vent
(Ground Flat Helps to Relieve Trapped Air)**

**Standard Round
(Non-Vented)**

MISCELLANEOUS FASTENERS

Rod Ends Threaded

- Material: Alloy Steel
- Finish: Black Oxide
- Heat Treat: 32-36 Rc
- Thread: Class 2A-UNC
- * 150,000 PSI Tensile

Rod Ends are forged and finished for applications not requiring flat contact with the head. All holes are reamed. Rod Ends can be used with spherical flange assemblies, flange nuts and clamp assemblies.

*B dimension indicates minimum length. **Not to be used for lifting.**

Blank Rod Ends can be machined to your specifications; please send prints for quotation. Maximum thread length 1/2" from head.

Yokes Tapped

- Material: C-1021 Forging
- Finish: Black Oxide
- Thread: 2B

Jergens offers these yokes for attaching to threaded linkage at stem end. The forged holes are reamed and faced-off parallel inside and outside the yoke ends.

Leveling Mounts

- Material: 1214 Steel
- Zinc plated, yellow finish
- Non-Skid Material: Neoprene
- Case hardened, file hard

- Swivels 10° in all directions
- Available with non-skid on base
- Available in stainless steel, or with a delrin pad, and in larger sizes upon request.

USAE™ Heavy Duty Flat Washers

USS + SAE = USAE

What is a USAE™ Washer?

- It is a simple but effective idea that is long overdue.
- The Outside Diameter conforms to USS standards. This provides a washer that is up to 36% larger than standard hardened washers.

More Contact Area = More Holding Power

- The Inside Diameter conforms to SAE standards. The small ID provides a more precise fit on bolts, studs, etc.
- USAE Washers are also up to 37% thicker than standard hardened washers for greater strength.
- Washers are made from mild steel. They are case hardened to 60 HRc and have a black oxide finish.
- Bolt size is stamped on each washer for easy identification.

USAE™ Heavy Duty Flat Washers

Part No.	Bolt Size	A (OD)	B (ID)	C (Thickness)
FW00001	1/4	3/4	9/32	9/64

THE **Jergens**® DIFFERENCE

Spinner-Grip™ Flange Lock Nuts

OURS

All-metal Construction

Spinner-Grip Flange Lock Nut
All-metal construction creates a
free-spinning installation.

THEIRS

Nylon Locking Mechanism

Nylon Insert Lock Nut
Nylon locks to threads making it
necessary to wrench the nut down the bolt.

SPINNER-GRIP FLANGE LOCK NUTS

Free-spinning design allows for easy installation.

Locks to the base part, allowing better hold of
the entire fastener assembly.

All-metal construction is more effective in
harsh environmental conditions, such as high
temperatures and humidity.

Re-uses are virtually unlimited.

VS.

NYLON INSERT LOCK NUTS

Must be wrenched down the bolt threads.

Locks to bolt threads.

Heat, humidity, and moisture can soften nylon
causing product failures.

Limited to 5 reuses or less.

Plastic Solid Handwheel With Revolving, Fold-Away Handle ELESA Original Design

- Material: High Impact Strength Technopolymer
- Finish: Black Matte
- Hub: Black Oxide Steel
- Resistant to Solvents, Oils, Greases, and other Chemical Agents

This type of handwheel with fold-away handle has been designed for applications where limited space or safety reasons demand that the handle be folded back flat after manual use.

Plastic Solid Handwheel With Revolving, Spring Loaded, Fold-Away Handle ELESA Original Design

- Material: High Impact Strength Technopolymer
- Finish: Black Matte
- Hub: Black Oxide Steel
- Resistant to Solvents, Oils, Greases, and other Chemical Agents

This handwheel has a special spring loaded handle which automatically folds down into the cavity of the handwheel when the operator releases it. The handle disengages only when the axial pressure exerted by the operator ceases.

Quick Lock Hand Knob

- Material: 40 Grey Iron
- Finish: Zinc Plate
- Thread: Class 2B-UNC
- 3D Solid Models are available in multiple formats from www.jergensinc.com

Used to save time where a knob must be completely removed from the stud. After approximately one-quarter turn of the hand knob, it can be tilted on an angle and removed from the stud. Recommended for light duty applications.

Aluminum Revolving and Solid Handle

- Material: Handle, 2024 Aluminum
Stem, Low Carbon Steel
- Finish: Revolving Handle, Clear or Black Anodize
Stem for Revolving Handle, Zinc Plate
Solid Handle, Plain
- 3D Solid Models are available in multiple formats from www.jergensinc.com

HANDLES, LEVERS & CRANKS

Aluminum & Malleable Speed Handle

- Material: 319 Aluminum
Malleable ASTM A47, GR32510
- Finish: Mill
- Thread: 2B-UNC or class 6h
- Can be used with rod ends for clamping tank covers, locking lids or any fast spin locking application
- With or without tapped or blank hole
- Three head widths
- 3D Solid Models are available in multiple formats from www.jergensinc.com
- "D" dimension is based on machined castings. It may be slightly greater on blanks.

* Center Hole is cross drilled on one side.

† Dimension for Revolving Style

Aluminum Balanced Crank Handle

Jergens Aluminum Balanced Crank Handles are good replacements for heavier steel handles. The light-weight characteristics make table positioning easier as no fall-off occurs after position has been established. Light-weight Aluminum Balanced Crank Handles are ideal for applications such as optical jig boring equipment and inspection instruments.

- Material: 319 Aluminum Alloy
- Finish: Grey Enamel
- 3D Solid Models are available in multiple formats from www.jergensinc.com

Metal Adjustable Handles

For adjustable clamping or tightening controls for limited operating angles. Adjustment of handle position occurs by pulling up on the handle, which disengages the teeth from the locking mechanism, and turning to the desired position. Releasing the handle allows for tightening or loosening.

Tapped Holes:

- Material: Handle, Die Cast Zinc
- Finish: Handle, Plastic Coated
Steel Parts, Black Oxide
- Color: Black Satin Finish

Stainless Steel Tapped Holes:

- Material: Handle, Die Cast Zinc Steel Parts, 303 Stainless Steel
- Finish: Handle, Plastic Coated Steel Parts, Bright
- Color: Black Satin Finish

*Straight base type dimension
Note: Width of tee handle is 1 5/8"

- U-Bar models include 2 flange washers

70280

This small compact clamp is equipped with a blue vinyl T-shaped grip handle; ideal for moderate to light duty clamping. It is supplied with a 70917 vinyl coated spindle assembly with washer.

- Holding capacity: 150 lbs.
- Weight: 2 oz.
- Handle moves 175°, bar 92°
- U-Bar: 5/16" height, 7/32" inside width
- Horizontal spindle adjustment: 5/8"
- Spindle Thread: 10-32
- Spindle Number: 70917

Part Number	S.S. Part No.	A	B	C	D	E	F	G
70280	71015	1 13/32	17/32	2 1/4	17/32	5/8	1/4	1 1/32

Note: Width of tee handle is 1 1/16"

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Vertical

70330

This clamp has a narrow bar with a stationary spindle that accepts all 1/4-20 diameter spindles. Each clamp is supplied with a 70926 neoprene tipped spindle assembly. The vertical handle type is supplied with a blue vinyl handle.

- Holding capacity: 200 lbs. max.
- Weight: 6 oz.
- Handle moves 60°, bar 117°
- Solid Bar: 3/8" height, 7/32" wide
- Spindle Thread: 1/4-20

Part Number	A	B	C	D	E	F	G	H	J	Handle Type	Bar Type	Base Type

*Straight base type dimension
Note: Width of tee handle is 2 9/16"

- Solid arm models include a bolt retainer
- U-Bar models include 2 flange washers

70342

This vertical clamp is equipped with a 1/4-20 spindle which has a tip, washers, and locknut for easy clamping. A blue vinyl handle is included. Each clamp is supplied with a 70926 vinyl coated spindle assembly with washer.

- Holding capacity: 250 lbs.
- Weight: 6 oz.
- Handle moves 64°, bar 104°
- U-Bar: 3/8" height, 1/4" inside width
- Horizontal spindle adjustment: 1 1/8"
- Spindle Thread: 1/4-20
- Spindle Number: 70926

*Straight base type dimension
Note: Width of tee handle is 2 9/16"

- Solid arm models include a bolt retainer
- U-Bar models include 2 flange washers

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Vertical

70350

This popular style of clamp includes solid bar and U-Bar construction. Each clamp accepts all 5/16-18 diameter spindles. Each clamp is supplied with a 70947 neoprene tipped spindle assembly. The vertical handle type is supplied with a blue vinyl handle.

- Holding capacity: 500 lbs. max.
- Weight: 11 oz.
- Handle moves 60°, bar 100°
- Solid Bar: 5/8" height, 1/4" wide
- U-Bar: 5/8" height, 21/64" inside width
- Horizontal spindle adjustment: 1 1/2"
- Spindle Thread: 5/16-18

Part Number	A	B	C	D	E	F	G	H	J	Handle Type	Bar Type	Base Type

*Straight base type dimension. Note: Width of tee handle is 3 5/8".

- Solid arm models include a bolt retainer
- U-Bar models include 2 flange washers

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Vertical

70440

This large capacity clamp is available in solid bar and U-Bar construction. It accepts all 3/8-16 diameter spindles. The solid bar clamp is supplied with a 70910 bolt retainer and 70915 neoprene tipped spindle assembly. The U-Bar style is supplied with 2 flanged washers and the 70915 spindle assembly. The vertical handle type is supplied with a blue vinyl handle.

- Holding capacity: 750 lbs. max.
- Weight: 1 lb., 5 oz.
- Handle moves 58°, bar 106°
- Solid Bar: 3/4" height, 5/16" wide
- U-Bar: 3/4" height, 7/16" inside width
- Horizontal spindle adjustment: 2 9/16"
- Spindle Thread: 3/8-16

Part Number	A	B	C	D	E	F	G	H	J	Handle Type	Bar Type	Base Type

*Straight base type dimension. Note: Width of tee handle is 5".

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

70470

This heavy duty clamp is available with solid bar and U-Bar construction. It accepts all 1/2-13 diameter spindles. The solid bar model is supplied with a 70901 bolt retainer. The U-Bar model is supplied with 2-70902 flanged washers. **Spindle assembly 70903 must be ordered separately for both models.**

- Holding capacity: 1000 lbs. max.
- Weight: 2 lbs., 7 oz.
- Handle moves 67°, bar 120°
- Solid Bar: 7/8" height, 3/8" wide
- U-Bar: 7/8" height, 17/32" inside width
- Horizontal spindle adjustment: 3 1/8"
- Spindle Thread: 1/2-13

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

TOGGLE CLAMPS

Hold Down Vertical

70480

This is the largest capacity vertical style clamp. It's available in solid bar or U-Bar construction and accepts all 5/8-11 diameter spindles. The solid bar is supplied with a 70940 bolt retainer. The U-Bar is supplied with 2-70941 flanged washers. **Spindle assembly 70942 must be ordered separately.** Each model is supplied with a blue vinyl handle.

- Holding capacity: 1200 lbs. max.
- Weight: 5 lbs., 2 oz.
- Handle moves 70°, bar 140°
- Solid Bar: 1 1/4" height, 3/8" wide
- U-Bar: 1 1/4" height, 21/32" inside width
- Horizontal spindle adjustment: 4"
- Spindle Thread: 5/8-11

Part Number	A	B	C	D	E	F	G	H	J	Handle Type	Bar Type	Base Type
70480	12 1/8	3 1/4	9	2	2 3/4	—	1/2	1/2	5 7/8	Vertical	Solid	Flange

71037	5 1/2	6 7/16	2 3/4	5/8	1	1 3/8	1 1/2	2 1/2	—	Solid	16

- Solid arm models include a bolt retainer
- U-Bar models include 2 flange washers

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Horizontal

70210

The small size of this clamp is ideal for jobs requiring minimal hold down force. Available in solid or U-Bar construction. All models are supplied with 70962 nylon spindle assemblies and blue vinyl handles.

- Holding capacity: 60 lbs.
- Weight: 1 oz.
- Handle moves 80°, bar 90°
- Solid Bar: 3/32" height, 1/4" wide
- U-Bar: 1/4" height, 3/16" inside width
- U-Bar horizontal spindle adjustment: 3/8"
- Spindle Thread: 8-32

Note: J dimension goes all the way to end of the U-Bar models

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Horizontal

70240

This medium duty clamp is ideal for limited space applications. It is supplied with a 70926 neoprene tipped spindle assembly.

- Holding capacity: 200 lbs.
- Weight: 5 oz.
- Handle moves 60°, bar 90°
- U-Bar: 1/2" height, 17/64" inside width
- Horizontal spindle adjustment: 1 1/4"
- Spindle Thread: 1/4-20

• U-Bar models include 2 flange washers

70262

These medium and large capacity clamps have a large clearance area between the bar and the handle when the clamps are in the fully open position. A blue vinyl handle is included.

- For 70262
 - Holding capacity: 200 lbs.
 - Weight: 7 oz.
 - Handle moves 76°, bar 92°
 - U-Bar: 1/2" height, 1/4" inside width
 - Horizontal spindle adjustment: 1 21/32"
 - Spindle Number: 70926
- For 70264
 - Holding capacity: 500 lbs.
 - Weight: 16 oz.
 - Handle moves 62°, bar 92°
 - U-Bar: 9/16" height, 11/32" inside width
 - Horizontal spindle adjustment: 1 13/32"
 - Spindle Number: 70947

• Solid arm models include a bolt retainer
• U-Bar models include 2 flange washers

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Hold Down Horizontal

70250

Similar to model 70240, except larger in overall size and capacity. Supplied with a 70947 neoprene tipped spindle assembly.

- Holding capacity: 500 lbs. max.
- Weight: 9 oz.
- Handle moves 65°, bar 90°
- U-Bar: 1/2" height, 21/64" inside width
- Horizontal spindle adjustment: 1 3/8"
- Spindle Thread: 5/16-18

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Straight Line

70810

This straight-line extra heavy duty clamp is constructed of malleable iron castings and cold rolled steel. The pivot joints are stainless steel. The mounting base is precision machined for flatness. A blue vinyl handle is included.

- Holding capacity: 500 lbs.
- Weight: 14 oz.
- Plunger travel: 1 3/16"
- Plunger tapped: 5/16-18 X 1 1/8" deep

Part Number	B	C	D	E	G	H	J	Mounting Holes
70810	1	4 3/4	1 3/8	1 5/8	5/16	5/16	2 1/4	9/32

TOGGLE CLAMPS

70830

Same construction as 70810 with larger capacity. The base has 11/32" diameter holes for 5/16" screws. A blue vinyl handle is included.

- Holding capacity: 850 lbs.
- Weight: 1 lb., 4 oz.
- Plunger travel: 1 5/8"
- Plunger tapped: 3/8-16 X 1 1/8" deep

Part Number	B	C	D	E	G	H	J
70830	1 1/4	6 1/4	1 5/8	1 5/8	5/16	5/16	3

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Straight Line

70850

Same construction as 70810 with three times the holding capacity. Our most powerful straight line action toggle clamp. A blue vinyl handle is included.

- Holding capacity: 1500 lbs.
- Weight: 3 lb.
- Plunger travel: 2 11/32"
- Plunger tapped: 1/2-13 X 1 1/2" deep

Part Number	B	C	D	E	G	H	J
70850	1 3/4	9 1/2	2	2	3/8	3/8	4 5/8

70818

This light duty clamp is equipped with an 8-32 tapped plunger. A blue vinyl handle is included.

- Holding capacity: 90 lbs.
- Weight: 1.5 oz.
- Plunger travel: 5/8"
- Plunger tapped: 8-32 X 15/32" deep

Part Number	A	B	C	D	F	G	H	I	J	K	L	M	N	O

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

TOGGLE CLAMPS

Straight Line

70860

The forged steel construction enables this powerful plunger-style clamp to perform on rugged, heavy duty applications. Handle locks in both push and pull positions. A blue vinyl handle is included.

- Holding capacity: 2500 lbs.
- Weight: 2 lbs., 2 oz.
- Plunger travel: 2"
- Plunger tapped: 3/8-16 X 1 1/4" deep

Part Number	A	B	C	D	E	G	H	J	Base Type
70860	2 7/8	13/16	7 1/16	1 3/8	1 5/8	1/2	5/16	5 1/16	Flange

For accessories see page 161. For interchangeability with other toggle clamps, see page 184.

Squeeze Action — Forged Jaws

These forged steel, squeeze action, plier clamps can be used in a wide range of applications. Ideal for clamping, fixturing, holding, processing, or positioning. All models are supplied with spindle assemblies.

HDV Series Heavy Duty Vertical Clamps

Features:

All **HDV** series clamps are designed to be adaptable and durable, and to withstand abuse in heavy duty applications.

The **HDV** series have a phosphated corrosion resistant finish.

Models HDV660WW, HDV1500WW, HDV2600WW and HDV5200WW comprise a basic toggle mechanism onto which can be welded at the desired angle the clamping arm and handle which can be specified as accessories. These models feature a swivel base which is welded at the desired angle to the mechanism, and then welded either directly to a fixture, or alternatively to a base which is offered as an accessory for bolt mounting.

Models HDV660SW, HDV1500SW, HDV2600SW and HDV5200SW share all the features of the above models, but with a straight base which can be directly bolt mounted or welded to a fixture, or alternatively to the accessory base for bolt mounting.

Models HDV660SS, HDV1500SS, HDV2600SS and HDV5200SS are similar to the type 'T' models, but with a handle with a PVC grip fitted vertically, and a longer stub clamping arm which can be modified and the spindle retainer supplied welded in the desired position.

Models HDV660FA, HDV1500FA, HDV2600FA and HDV5200FA feature a flanged base with holes for bolt mounting, a handle with PVC grip fitted vertically, and a fixed spindle or setscrew position which does not require welding.

Specifications:

The main components are of steel, the forked lower handles being precision alloy steel castings, and all axles of hardened steel running in either hardened bushes or directly in the close-toleranced holes of hardened parts. The clamps are finished chemi-black.

Installation:

When welding the swivel base of the 'Stub Nose' models to the clamp mechanism ensure that the full length of the adjoining surfaces are welded. Ensure that welding spatter does not enter the slots which form the forward stop of the mechanism.

The handle pivot bolt may be adjusted if required to remove excess free play from the mechanism.

Frequent lubrication will extend the life of the clamp.

Hold Down Vertical

Part Number
72120

Model HDV660/WW

Arm: Stub nose for welded extension
Base: Swivel for welding in the desired position
Nominal Holding Force: 660 lbs.
Weight: 6 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 165 for accessories and handles.

Part Number
72101

Model HDV660/SW

Arm: Stub nose for welded extension
Base: Straight
Nominal Holding Force: 660 lbs.
Weight: 6 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 165 for accessories and handles.

Part Number
72102

Model HDV660/FW

Arm: Stub nose for welded extension
Base: Flanged
Nominal Holding Force: 660 lbs.
Weight: 7 oz.

See page 165 for accessories and handles.

Hold Down Vertical

Part Number
72103

Model HDV660/SA

Arm: The spindle is adjustable along the arm
 Base: Straight
 Nominal Holding Force: 660 lbs.
 Weight: 9 oz.
 Supplied complete with: Set screw & nuts,
 Flanged washer

See page 165 for accessories and handles.

Part Number
72104

Model HDV660/FA

Arm: The spindle is adjustable along the arm
 Base: Flanged
 Nominal Holding Force: 660 lbs.
 Weight: 9 oz.
 Supplied complete with: Set screw & nuts,
 Flanged washer

See page 165 for accessories and handles.

Part Number
72105

Model HDV660/FA2

Arm: The spindle is adjustable along the arm
 Base: Flanged
 Nominal Holding Force: 660 lbs.
 Weight: 9 oz.
 Supplied complete with: Set screw & nuts,
 Flanged washer

See page 165 for accessories and handles.

Hold Down Vertical

HDV660 Series Accessories

Part No. 72130

Handle: For welding at the desired angle to HDV660/WW & HDV660/SW
Weight: 2 oz.

Part No. 72131

Grip: To fit Part No. 72130 handle
Weight: 0.5 oz.

Part No. 72132

Arm: For extending the stub arms of HDV660/WW & HDV660/SW
Weight: 3 oz.

Part No. 72133

Base: For bolt mounting HDV660/WW & HDV660/SW
Weight: 2 oz.

Model HDV1500/WW

Arm: Stub nose for welded extensions
Base: Swivel for welding in the desired position
Nominal Holding Force: 1,543 lbs.
Weight: 1lb 7 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 166 for accessories and handles.

Part Number
72121

Model HDV1500/SW

Arm: Stub nose for welded extensions
Base: Straight
Nominal Holding Force: 1,543 lbs.
Weight: 1lb 9 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 166 for accessories and handles.

Part Number
72106

Hold Down Vertical

Part Number
72107

Model HDV1500/SS

Arm: Solid arm
 Base: Straight
 Nominal Holding Force: 1,543 lbs.
 Weight: 2 lbs 5 oz.
 Supplied complete with: Spindle retainer,
 Setscrew & nuts

See below for accessories and handles.

Part Number
72108

Model HDV1500/FA

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 1,543 lbs.
 Weight: 2 lbs 9 oz.
 Supplied complete with: Setscrew & nuts

See below for accessories and handles.

HDV1500 Series Accessories

Part No. 72140

Handle: For welding at the desired angle to HDV1500/WW & HDV1500/SW
 Weight: 5.3 oz.

Part No. 72141

Grip: To fit Part No. 72140 handle
 Weight: 0.3 oz.

Part No. 72142

Arm: For extending the stub arms of HDV1500/WW & HDV1500/SW
 Weight: 5.5 oz.

Part No. 72143

Base: For bolt mounting
 VHDV1500/WW & HDV1500/SW
 Weight: 3 oz.

Hold Down Vertical

Part Number
72122

Model HDV2600/WW

Arm: Stub nose for welded extensions
Base: Swivel for welding in the desired position
Nominal Holding Force: 2,646 lbs.
Weight: 2 lbs 10 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 168 for accessories and handles.

Part Number
72109

Model HDV2600/SW

Arm: Stub nose for welded extensions
Base: Straight
Nominal Holding Force: 2,646 lbs.
Weight: 3 lbs 2 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 168 for accessories and handles.

Part Number
72110

Model HDV2600/SS

Arm: Solid arm
Base: Straight
Nominal Holding Force: 2,646 lbs.
Weight: 4 lbs.
Supplied complete with: Spindle retainer,
Setscrew & nuts

See page 168 for accessories and handles.

Hold Down Vertical

Part Number
72111

Model HDV2600/FA

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 2,646 lbs.
 Weight: 4 lbs 4 oz.
 Supplied complete with: Setscrew & nuts

See below for accessories and handles.

HDV2600 Series Accessories

Part No. 72150
 Handle: For welding at the desired angle to HDV2600/WW & HDV2600/SW
 Weight: 8 oz.

Part No. 72151
 Grip: To fit Part No. 72150 handle
 Weight: 0.3 oz.

Part No. 72152
 Arm: For extending the stub arms of HDV2600/WW & HDV2600/SW
 Weight: 11 oz.

Part No. 72153
 Base: For bolt mounting
 HDV2600/WW & HDV2600/SW
 Weight: 4 oz.

Hold Down Vertical

Part Number
72123

Model HDV5200/WW

Arm: Stub nose for welded extensions
Base: Swivel for welding in the desired position
Nominal Holding Force: 5,291 lbs.
Weight: 6 lbs 4 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 170 for accessories and handles.

Part Number
72112

Model HDV5200/SW

Arm: Stub nose for welded extensions
Base: Straight
Nominal Holding Force: 5,291 lbs.
Weight: 7 lbs 1 oz.

See "Features and Installation Information" on page 162 for Installation Instructions.

See page 170 for accessories and handles.

Part Number
72113

Model HDV5200/SS

Arm: Solid arm
Base: Straight
Nominal Holding Force: 5,286 lbs.
Weight: 8 lbs 3 oz.
Supplied complete with: Spindle retainer, Setscrew & nuts

See page 170 for accessories and handles.

Hold Down Vertical

Part Number
72114

Model HDV5200/FA

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 5,286 lbs
 Weight: 9 lbs.
 Supplied complete with: Setscrew & nuts

See below for accessories and handles.

HDV5200 Series Accessories

Part No. 72170

Handle: For welding at the desired angle to HDV5200/WW & HDV5200/SW
 Weight: 10.3 oz.

Part No. 72171

Grip: To fit Part No. 72170 handle
 Weight: 4 oz.

Part No. 72172

Arm: For extending the stub arms of HDV5200/WW & HDV5200/SW
 Weight: 1 lb 8 oz.

Part No. 72173

Base: For bolt mounting HDV5200/WW & HDV5200/SW
 Weight: 7 oz.

Vertical Cam Clamps

Features:

Cam clamps are similar to vertical clamps but the clamping force is generated not by a toggle linkage, but by the action of a roller on a cam.

The cam action allows components of differing thickness to be clamped without readjustment of the clamping spindle.

Model JCV155/FF can clamp parts with thickness varying by up to 1/16", and models JCV550/FF and JCV770/FF thickness varying by up to 5/64".

A comfortable, cushioned PVC handle grip is fitted to all three models of cam clamp.

Specifications:

The main components are of zinc plated and passivated steel, the cam and its roller being case hardened to resist wear.

Rivets are of stainless steel, which burnishes and work-hardens with use, the rivets of models JCV550/FF and JCV770/FF rotating in hardened bushes. The setscrews are made of steel.

Vertical Cam Clamps

Part Number
72160

Model JCV/155/FF

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 165 lbs.
 Weight: 1.3 oz.
 Supplied complete with: Setscrew & nuts

Part Number
72161

Model JCV550/FF

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 550 lbs.
 Weight: 9 oz.
 Supplied complete with: Setscrew & nuts

Part Number
72162

Model JCV770/FF

Arm: The spindle is in a fixed position
 Base: Flanged
 Nominal Holding Force: 770 lbs.
 Weight: 1 lb 6 oz.
 Supplied complete with: Setscrew & nuts

Heavy-Duty & Long-Handled Push-Pull Clamps

- Low profile handle
- Heavy duty link
- Ribbed housing provides extra protection against side impact
- Locks in both forward and rear position

Features:

These clamps are of exceptionally robust construction featuring cast and machined handles and bases. The clamps are designed with a low plunger height and with the mechanism guarded within the base to avoid finger traps.

Models HDP1300, HDP2600, HDP5500, and HDP11000 have handles of normal length for clamping. The long handled 'L' versions (HDP1300/L, HDP5500/L, and HDP11000/L) have their handles either to the front or rear of the clamp according to the application and produce high forces which make them suitable for clamping or for light work such as swaging, rivetting, press fitting components, etc. All models are fitted with a comfortable, cushioned PVC handle grip.

Specifications:

The bases of all models, and the handles of models HDP1300, HDP2600, HDP5500, and HDP11000 are machined cast iron.

The handles of the 'L' versions are of steel bar and mount in housings which are either machined steel castings or machined from steel bar.

The plungers are of steel, and their precision ground diameter runs in a close-toleranced hole in the base casting.

All axles are of hardened steel and run in either the cast iron of the handle, or in the close-toleranced holes of hardened parts.

All models are supplied with a steel setscrew.

Heavy-Duty & Long-Handled Push-Pull Clamps

Part Number
72201

Model HDP1300

Plunger: Locks at both extended & retracted ends of the stroke
 Base: Body mounting
 Nominal Holding Force: 1,322 lbs.
 Weight: 1 lb
 Supplied complete with:
 Setscrew & nut

Part Number
72202

Model HDP2600

Plunger: Locks at both extended & retracted ends of the stroke
 Base: Body mounting
 Nominal Holding Force: 2,643 lbs.
 Weight: 3 lbs
 Supplied complete with:
 Setscrew & nut

TOGGLE CLAMPS

Heavy-Duty & Long-Handled Push-Pull Clamps

Part Number
72203

Model HDP5500

Plunger: Locks at both extended & retracted ends of the stroke
Base: Body mounting
Nominal Holding Force: 5,507 lbs
Weight: 8 lbs
Supplied complete with: Setscrew & nut

Part Number
72204

Model HDP11000

Plunger: Locks at both extended & retracted ends of the stroke
Base: Body mounting
Nominal Holding Force: 11,013 lbs
Weight: 13 lbs 6 oz.
Supplied complete with: Setscrew & nut

Heavy-Duty & Long-Handled Push-Pull Clamps

Part Number
72205

Model HDP1300/L

With 31 lbs handle force the

output force is:	lbs
Fully retracted	1,035
0.197 extended	242
0.394	154
0.591	165
0.787	176
1.00	187
1.180	322
1.219	419
Fully extended	1,277

Plunger: Locks at both extended & retracted ends of the stroke

Base: Body mounting

Nominal Holding Force: 1,322 lbs

Weight: 1 lb 2 oz.

Supplied complete with: Setscrew & nut

Part Number
72206

Model HDP2600/L

With 33 lbs handle force the

output force is:	lbs
Fully retracted	1,553
0.197 extended	368
0.394	198
0.591	161
0.787	154
1.00	159
1.180	187
1.377	220
1.573	242
1.769	330
1.887	485
1.926	639
Fully extended	2,048

Plunger: Locks at both extended & retracted ends of the stroke

Base: Body mounting

Nominal Holding Force: 2,643 lbs

Weight: 3 lbs 6 oz.

Supplied complete with: Setscrew & nut

Heavy-Duty & Long-Handled Push-Pull Clamps

Part Number
72207

Model HDP5500/L

With 37 lbs handle force the

output force is: lbs

Nominal Holding Force: 11,013 lbs.

Weight: 15 lbs 6 oz.

Supplied complete with: Setscrew & nut

TOGGLE CLAMPS

Horizontal Latch Clamps

Features:

Latch clamps are available in two sizes. Bracket holes will not elongate over time. They have a small footprint for space constrained applications.

All latch clamps are fitted with PVC handle grips.

Specifications:

The HDL Series clamps have precision cast steel bases and latch brackets with cast iron handles. The finish is black oxide.

Installation:

It is important that the clamp and latch bracket are in alignment when viewed from both the top and the side to ensure that the clamp locks over center correctly.

The 'U' bolt should be adjusted to ensure an equal pull on either side.

Horizontal Latch Clamps

Part Number
72301

Model HDL4400

Nominal Holding Force: 4,405 lbs
Weight: 3 lbs 1 oz.
Supplied complete with: Latch Bracket as shown

Part Number
72302

Model HDL8800

Nominal Holding Force: 8,811 lbs
Weight: 5 lbs 9 ozs.
Supplied complete with: Latch Bracket as shown

Magna Force Heavy Duty Cam Clamps

- Unique, patented range of cam clamps
- Rugged build quality, ideal for machine shops
- Clamping forces from 660 lbs to 11,000 lbs
- Significant cost benefits over strap clamps in repetitive machining
- A fraction of the cost of hydraulic workholding

Heavy Duty Cam Clamps

Model HDC8800R (Clockwise)
HDC8800RB (Counter Clockwise)

Operating clamping force: 1,680 lbs (hand applied),
 9,000 lbs (mallet applied)
 Weight: 1.21 lbs

Part Number
72401
72402

Model HDC11000R (Clockwise)
HDC11000RB (Counter Clockwise)

Operating clamping force: 1,900 lbs (hand applied),
 11,240 lbs (mallet applied)
 Weight: 2.9 lbs

TOGGLE CLAMPS

We Are Jergens

WORKHOLDING SOLUTIONS

Support, Locate and Hold:

From standard components like toggle screws and T-bolts to vises and quick change fixture systems like Ball Lock® and ZPS.

SPECIALTY FASTENERS

Fasten, Strengthen and Secure:

From threaded inserts and Spinner-Grip™ Flange Nuts & Bolts to Kwik-Lok® Pins.

LIFTING SOLUTIONS

Lift, Turn and Track:

From chain sling and eye bolts to hoist rings and our proprietary Lift ID™ Automated Inspection and Compliance program.

We got our start back in 1942, manufacturing tooling components to help American manufacturers operate quickly and more efficiently. “The Standard Components with the Highest Standards.” This founding philosophy put Jergens on the forefront of the “lean manufacturing” movement before anyone even thought to put those two words together.

In the years since, Jergens has structured its offering to advance the cause of leaner manufacturing, adding products and engineered solutions for an integrated approach to “Manufacturing Efficiency.”

You can find Jergens products just about anywhere in the manufacturing environment.
